In which you may behold the state of this Present YEAR of our *LORD GOD*, 1696.

CONTAINING

The Description of the Four Seasons, the *Eclipses*, the *Passions* of the *Planets*, and the *Inclination* of the *Air*.

Also *Physical Verses*, and *Short Notes* and *Rules* for *Husbandry*, for every Month throughout the Year.

With divers other *Notes* and *Rules* of Good Consequence, not formerly Published in this *PROGNOSTICATION*.

By *WILLIAM DADE*, Gent.

LONDON,
Printed by *T. J.* for the Company of STATIONERS.

Physical VERSES AND Rules for HUSBANDRY.

Of JANUARY.

If thou be sick, and help would'st have,
The Counsel of the Learned crave:
If thou hast health, to keep thee so,
Fly Idleness as deadly Foe.

January's *Instructions for Husbandry.*

This Month set all kind of Fruit-Trees, and Quicksets: In the New of the Moon (the wind and weather observed) you may set Pease and Beans, Parsnips and Oats, if the weather prove mild, and the Moon decreasing.

Of FEBRUARY.

Be choice of Food in any wise,
To keep thee warm also precise:
Beware likewise thou let not Blood,
Except the Learned say 'tis good.

Februaries *Instructions for Husbandry.*

This Month set Roses, with all other kind of Plants and Quicklets, sowe Pease and Onions as in the Month before (the weather consider'd) you may now Garden for Sallet-herbs, Pot-herbs, and such like.

Of MARCH.

Now Bleed, and Bath, if thou desire,
And Purge also (if need require)
Ill humors do in many breed,
Provide in time before you need.

March's

March's *Instructions.*

This Month (in the New of the *Moon*) Graft, Set Quick-sets, and Vines, Cut your Hedges and Vines already growing. Also you may sowe Onions, Beans, and Oats, and all manner of Garden-herbs.

Of APRIL.

Now wholsome Baths thou may'st frequent,
Let Blood also, and not repent;
These are good meanes thee to defend,
From Griefs, the which on thee attend.

April's *Instructions.*

In this Month Pole your Hops, sowe Barley and Artichokes, Bark Trees for Tanners, sowe Hemp and Flax, set Cytrons, Melons and Cucumbers, and furnish and replenish your Gardens with Summer Herbs.

Of MAY.

Rise early now this Month of May,
And walk the Fields that be so gay;
From Surfeiting see thou refrain,
Or sure it will procure thy pain.

May's *Instructions.*

In the beginning of this Month you may sowe the Seeds of Summer Herbs, which could not endure the cold of the forepassed Months: You may yet sowe Hemp and Flax. Weed your Hop-Gardens, and take away superfluous Branches, and Moss your Gardens.

Of JUNE.

Drinks New or Sweet, Taste not at all
For, thereby grows no danger small

And, to thy self such pastime take,
As may in God thee merry make.

June's *Instructions.*

In this Month (at the Full of the *Moon*) Gather your herbs to keep dry for the whole year, Weed your Corn-fields and Gardens, Set Rosemary and Gilliflowers, Sow Lettuce, Sheer Sheep, the Moon increasing.

Of JULY.

Perfume thy house with Sweets sweet,
But such as are for purpose meet,
Abroad as thou in Street dost go,
Defend thy self from Stinks also.

July's *Instructions.*

In this Month ply your Haying, Fallow your Lands for Wheat, Pull up Hemp that is ripe, get Rue and Wormwood to drive away Fleas and Moths. Dry Flowers in the shade, and then Sun them a little for fear of corruption.

Of AUGUST.

As burning Heat will thee destroy,
So showring Cold will thee annoy;
Let little sleep thee now content,
Purge out, ope Blood, lest thou repent.

August's *Instructions.*

Reap Wheat and Rye, cut down your Oats, Gather Garden-Seeds, Sow Lettuce and other Winter Herbs in the New of the Moon: Use moderate Diet, forbear to sleep presently after meat, take heed of sudden cold after great heat;

Of SEPTEMBER.

Raw Fruits (though ripe) may Sickness bring,

THE foregoing Rules for the Judgment of the Weather, are such as are deduced from the Aspects of the Planets to the Moon, and among themselves; These here following, are such as are deduced from Philosophical Aphorisms, Therefore,

1. The resounding of the Sea upon the Shoar, and the murmur of Winds in the Woods, when the Wind is not stirring abroad, doth shew Wind to follow.

2. The obscuring of the small Stars, foreshews Tempests.

3. When Stars seem to shoot, Wind comes from that Quarter.

4. If two Rainbows appear, Rain follows: But a Rainbow appearing after Rain, signifies fair Weather.

5. If the Sky be red in the Morning, it is a sure token of Wind or Rain to follow, or both; for the Vapors which cause that Redness will soon be dissolved.

6. If the Sun or Moon look pale, look for Rain; if fair and bright, fair Weather; if red, Wind.

7. If a dark Cloud be at Sun-rising, in which the Sun is soon after hid, it will dissolve it, and Rain will soon follow.

12. Water-Fowls (as Sea-gulls, Morehens, &c.) when they flock and flie together from the Sea toward the Shore. Also when Land-Fowls (as Crows, Swallows, &c.) when they flie from the Lands to the Waters, beating the Waters with their Wings, fore-shew Rain and Wind.

13. If the Circles about the Sun be red and broken, it portends Wind; if thick and dark, Wind, Snow, or Rain, and the same of the Circles about the Moon.

14. The Trefoil Grass, against Rain, swells in the Stalk, and standeth more upright.

15. The Wincowpipe (growing in Stubble-fields) if you find it open in the Morning, be sure of a fair Day to follow.

16. Aches, Hurts, and Corns, do engrieve against Rain, Snow, or Frost.

17. Worms coming out of the Earth, Moles casting up the Earth, Fleas biting more than ordinary, are evident Signs of Rain to follow.

18. Solid Bodies, as Stone and Wainscot, when they sweat, doth fore-shew Rain.

Of

Of the Four Quarters of the YEAR 1696.

Of WINTER.

WInter Quarter (after the *Aſtronomers* Account) began the 11th of *December*, at which time the Sun entered into *Capricorn* the laſt year, and continues till the Tenth of *March* this year. So that always the firſt part of the Aſtronomical Winter Quarter, is in one Politick year, and the latter end thereof is in the other.) At which time was the ſhorteſt day of the year, by reaſon of the Suns greateſt declination from the Equinoctial Line.

This Seaſon of its own diſpoſition, is known to be cold and moiſt, contrary to the quality of the Summer; and, in this Quarter the inward parts of Man are very hot and being healthful, may receive plenty of Food, becauſe natural heat is now comforted, and is gone inward, and there increaſeth, and maketh Digeſtion the better.

The Sickneſſes whereunto this Quarter is moſt inclined, are *Rheums*, *Gouts*, *Puſhes*, *Sore Eyes*, *Melancholy*, *Coughs*, *Catharrs*, *Sciatica's*, *Falling-Sickneſs*, Diſeaſes proceeding of *Rot-*

tenneſs and *Corrupt Humors*; with divers kind of *Infirmities* incident among Women.

Of the SPRING.

THe Spring-time (being the moſt pleaſant and Wholſom Seaſon of the Four) taketh its beginning on the Tenth of *March*, when the Sun entreth into the Equinoctial point *Aries*, making the days and nights of equal length; which Quarter endeth the 10th of *June*, when the Sun entreth into *Cancer*.

This ſeaſon is naturally hot and moiſt, and is of the Sanguine complexion, being the moſt temperate and healthful time of the year, and is therefore accounted the fitteſt time to eaſe diſeaſed Bodies in, and to reſtore health again in thoſe in whom formerly it hath been decayed by any kind of evacuation.

The Infirmities of this Quarter are *Melancholy*, *Madneſs*, the *Falling Sickneſs*, *Bleeding* at the *Noſe*, *Hoarſneſs*, *Coughs*, *Itch*, *Scabs*, many *Ulcers*, and ſmall *Apoſtumes*, the *Gout*, and *Pain in the Joynts*, *Pleuriſies*, *Dropſies*, *Peſtilent Agues*, *Shortneſs of Breath*, *Faintings*, *Pain in the Head*, *Eyes*, and *Stomach*, *Rotten Feavers*, and other *Strange Diſeaſes*.

Of SUMMER.

SUmmer (accounted the Third part of the Year *Aſtronomical*) taketh its beginning at the time of the Sunsentrance into the firſt min, of the Solſtitial Sign *Cancer*, which is the

Tenth

Tenth of *June*, at which time he makes his greateſt declination from the Equinoctial towards the North, and cauſeth the longeſt day and ſhorteſt night in the year; and ſo Summer holdeth on till the 12th of *September* following.

In this Quarter the Stomach cannot digeſt ſuch hard Meats as it will in the Winter ſeaſon, for that natural heat is now diſtributed into the exterior parts, and man is not now ſo hot within as in Winter.

The Sickneſſes at this time are divers, as *Burning Agues*, *Pleuriſies*, *Frenſies*, *Hot Apoſthumes*, *Divers pains in the Head*, *Sundry Inflamations*, and *New Infirmities*, proceeding eſpecially of *Hot Cholerick Humors*, wherewith many will be ſore moleſted.

Of AUTUMN or HARVEST.

Autumn or *Harveſt* (being the Fourth, or laſt Quarter of the Year) begins upon the 12th of *September*, the Sun then making his entrance into the ſecond Equinoctial Sign *Libra*, working the ſame effect that he did at his entring into *Aries*, that is, making the days and nights of equal length, riſing at ſix in the morning, and ſetting at ſix at night; and this Quarter doth laſt until the Eleventh of *December* following.

The quality of this Seaſon is naturally cold & dry, yet by reaſon of its mutability, 'tis the moſt unwholeſome; by means whereof, it is more ſubject to ſickneſs than any other: for the dregs of all diſeaſes, of the former parts of the year, will now break forth and be ſeen.

The Diseases of this Quarter are like to be many and dangerous, as *Black Jaundices, Mesrims, the Falling-Sickness, Oppilations in the Spleen, Difficulty of Breathing, Convulsion Fits, Dropsies, Sciatica's, Bites, Tooth-ach,* and many more: *From which good Lord deliver us.*

Of the ECLIPSES *this* YEAR 1696.

THere will be Four Eclipses this Year, Two of the *Sun*, and Two of the *Moon*; neither of those of the *Sun* will be conspicuous to us in *England*, and therefore I shall pass them by in silence: But those of the *Moon*, being both of them great Eclipses, I shall speak only of them.

The first Eclipse of the *Moon* will be upon Wednesday the Sixth of *May*, at a quarter of an hour before 12 at Night; at which time the whole Body of the *Moon* will be obscured, but immediately after she will begin to recover her Light again.

The Second will be upon Friday the 30th. of *October*, at 56 min. after Four of the Clock in the Morning, at which time she will be Totally Eclipsed.

Of

Of several Diseases, Maladies and other Distempers incident to Horses and other Cattle, with their Causes and Cures.

I. *An infallible Cure for a Swoln Foot.*

TAKE halfe an handful of Elder Leaves, a few Leaves of Grunsel, a few crops of Chick-weed, a small quantity of Housleek: Beat all these together in a Morter with some Swines Grease, till they be a Salve: Then make a Plaister thereof and apply it, it will quickly bring down the Swelling.

II. *To preserve or keep an Ox sound.*

Wash his mouth with his own Water and White Wine Vinegar, once in Ten or Twelve days, and it will bring a great deal of Flegme and Water off, which would take away his Stomach, and cause him to hang down his Ears, and have weeping Eyes.

Also, If you wash his Tongue and Mouth with White Wine Vinegar and Time, Stamped together, with a little Salt, it will make a Beast have a Stomach again, if he have lost it.

III. *To Cure Scabs on Beasts.*

Take the Beasts own Water, Butter, Salt, White Wine Vinegar, Salad Oyl, and a little Brimstone, all of them blended together; This mixture being rubbed on the Scabby place will cause it to heal presently.

IV. *For*

IV. *For a Beast that hath a Feaver.*

Feavers in Beasts are often caused by over driving, or by over-hard Labour, or by drinking of Cold Water when they be extream hot.

You may know whether a Beast hath this Distemper upon him by these Signs; For, his Eys will swell, he will be heavy in his head, and the extream heat which is in their Bodies will cause their hair to stand of a Sweat upon them.

To cure this Distemper; First, Give them some Grass and Lattice mixed with it, this will abate the inward heat, and the next Morning let them blood in the Neck Vein; then give them the juice of Purslen mixed with Gum Dragon, Aniseeds, Powder of Musk Roses, put into a Quart of Strong Ale Sweetned with Honey: Give them this three Mornings together milk warm, and keep the Beast warm also, and it will certainly cure him.

V. *To kill Lice in any Beast.*

Take Quick Silver, and kill it with Swines Grease, and rub them very well about the Horns, Head and Neck, and upon the Shoulders and Dew-lap, for they will lick the rest of their Bodies themselves — Also, if you strew some keene ashes on their hinder parts, and let them stand in the Rain a while, it will make them all fly away from the Beast for certain.

VI. *Three*

VI. *Three Remedies for an Ox or Cow, that hath loſt their Appetite.*

1. If a Beaſt be tired by Labour, and hath loſt its Appetite, cauſe it to ſwallow raw Eggs well beaten with Honey, Vinegar and Salt.

2. Take Horſehound made into fine Powder, and give it them to drink, and it will promote an Appetite.

3. Stamp the tops of Rue, Leeks, Smallage and Sage, and give it the Beaſt in White Wine to drink, and it will help him to an Appetite.

VII. *To Cure the Garget in the Head.*

You may know whether your Beaſt have this Infirmity, by the ſwelling of their Eyes and Lips; as alſo by looking into their Mouths for Bliſters on their Tongue, and if there be any break them; and if the Tongue be ſwol'n pull it forth, and look under it for Bliſters, and if there be any break them alſo: But if the Tongue be ſwol'n, and there be no Bliſters to be ſeen, take your Knife, and give the Tongue a Slit underneath of about an Inch long to let the Poyſon out: Then waſh it with Vinegar for the preſent; and an hour after give them 3 Penyworth of Fenigrick, Turmerick, Long Pepper, Liquores Powder and Aniſeeds, in a Quart of Strong Ale or Beer, Milk warm.

To prevent this Diſtemper, you muſt Blood your Beaſt well at Spring and Fall, giving them ſome Rue in a Pint of Ale, Beer, or Milk, warm.

VIII. *To*

Let the Beast blood in the Neck Vein, And give it to drink a Pint of Old Urine, with a good quantity of Hens dung Steeped in the same for Eight or Ten hours; as also a handful of Rue, strain them, and give every Beast a Pint to drink, and it will cure it.

IX. *For the Biting of the Shrew Mouse.*

This Shrew Mouse, is a more Venemous Beast then any; for if she bite any Beast (though but a little) it will swell abundantly.

Take Parsly seed, and boyle it in White Wine, Sallet Oyle and Hogs Grease: Also take some Powder of burnt Barley, and blend in it, working it like a Salve; and with this Anoint the Sore till it be well.

This is good also for to Cure the biting of Hedge-Hogs, and the stinging of Hornets.

X. *For the swelling of an Oxes Cod.*

Anoint the Cod with sweet Seame, at the first three times a day; and if it do not fall, then take Wall Earth, and dissolve it in Vinegar with the dung of an Ox, and with that bathe the Beasts Cod.
